

aquaZ

ENERGY EFFICIENT
SEA WATER DESALINATION
MEMBRANES

Potable water and waste water treatment.

- aquaZ develops a disruptive aquaporin-based membrane technology – increasing the efficiency of sea water desalination plants by 5-10 times
- We are deeply focused on developing cost-effective membranes which can be produced using standardized industrial processes
- Demonstrator membranes will be available in the near future
- Our technology is simply a quantum leap in water purification
